Sunday, March 23, 2008 - Our Trading Desk and Customer Support will re-open at 7:00pm ET and then resume normal business hours

Company Profile

FX Solutions was founded in 2001 by two foreign exchange veterans who realized the Internet could provide the retail trader with the same instantaneous price and deal information that had previously been available only to bank traders via private networks.

The company opened for business with five employees and has since grown to over 70 professionals. In 2003 FX Solutions began live trading on its Global Trading System (GTS) and began research and development on a proprietary "direct link" price feed. This revolutionary price discovery and delivery system would give retail traders their first true equality with the professional world of interbank traders. The speed and accuracy of the GTS platforms allow FX Solutions to serve retail clients, white label partners, and institutional trading partners. The company has been recognized as one of America's fastest growing private companies by Inc. magazine for three consecutive years. In a world cluttered with marketing and sales gimmicks, the FX Solutions commitment to its traders remains unique.

FX Solutions is regulated as a Forex Dealer Member by the Commodity and Futures Trading Commission (CFTC) and is a member of the National Futures Association.
